The District is not responsible for seedlings not picked up by 11:00 a.m. Saturday, April 30th. Planting survival rates of bare-root seedlings vary from site to site, from excellent to poor. We strive to provide the most viable seedlings. All efforts are made to prevent root stress. The Conservation District and seedling suppliers cannot guarantee the success rate of seedlings. Our Seedlings will be healthy when picked up, but not guaranteed after the pick up date. The District will not ensure successful planting of bare-root seedlings, just as our supplier will not ensure seedling survival. The District is not responsible for mistakes made by the suppliers of our seedling stock.

Please keep for your records

DESCRIPTION OF SEEDLINGS AVAILABLE  
YR = AGE OF SEEDLING, EXPECTED HEIGHT FROM OUR  
DISTRIBUTORS

**Colorado Blue Spruce** (*Picea pungens glauca*) 3 yr., 8"-16". Blue-green color, prickly texture and strong aroma render them conveniently deer-resistant. Grows to 6 feet in 10-12 years. **10=Bundle**

Colorado Blue Spruce

Red Cedar

**Red Cedar** (*Juniperus virginiana*) 2 yr., 10"-18" prickly, needled leaves are rich green in the summer but blush yellow-green to bronze-green in winter's cold. Best in deep, moist, well-draining soils, although it tolerates both wetland and dry, rocky sites, too. Provide a sunny location for densest foliage and best branch structure. Ideal for windbreak and dense foliage for wildlife. **10=Bundle**

Eastern White Pine

**Eastern White Pine**, (*Pinus strobus*) 2 yr., 5"-10". Very hardy pine that grows stately and gracefully tall. Needles are soft and bluish-green. With adequate moisture, growth can be 12" to 18" year. Ideal for specimen planting, shade, windbreaks and Christmas trees. **10=Bundle**

American Redbud

**American Redbud**, (*Cercis canadensis*) 6"-12" A small flat-topped tree, producing pink blooms on bare stems in early spring. Foliage is large and heart-shape, changing to yellow in the fall. Does well in a protected location. Does well in a variety of soils. **10=Bundle**

**American Hazelnut** (*Corylus americana*) 6"-12" Small multi-stemmed tree producing edible nuts also known as Filberts. Dark green foliage in summer turning bright yellow in the fall **10=Bundle**

American Hazelnut

Pitch Pine

Douglas Fir

Hackberry

**Hackberry** (*Celtis occidentalis*) 6"-12" An excellent wildlife plant bearing dark berries and growing about 40 ft tall. Tolerates adverse conditions **10=Bundle**

Buckeye Gala Apple

**Buckeye Gala Apple** solid red with a deep burgundy stripe. A pollinizer is recommended for maximum production. This apple is sweet like the other galas but has a more tangy taste.

**Honeycrisp Apple** The fruit is mostly orange-red with a yellow background. This crisp, juicy, sweet-tart apple has a rich flavor, fruit averages 3 inches and up. Outstanding winter hardiness gives this variety excellent potential for northern growing regions.

Honey Crisp Apple

Harrow Sweet Pear

**Harrow Sweet Pear** - A late season pear. Good resistance to fire blight. Fruit size and appearance are similar to that of Bartlett; however, Harrow Sweet does develop an attractive blush. Trees should be thinned to maintain fruit size and avoid biennial bearing.

**Potomac Pear**—(*Moonglow*) The fruit is moderate in size, averaging 2.5 inches. The flesh texture is moderately fine and buttery. The flavor is pleasingly sub-acid with a mild aroma. The tree is moderately vigorous and resistant to fire blight.

Potomac Pear

Contender Peach

**Contender Peach**—A high-quality, freestone variety ripening in the Loring season. Fruit is very firm, large, with excellent color. The trees are hardy and very productive.

**Stardust (Sweet) Cherry**—A late-season, late-blooming and self-fertile cherry. Stardust is firm with a blush finish and clear yellow flesh. This variety has good size as well as great fresh eating qualities. Tree is winter hardy and somewhat tolerant to spring frost.

Stardust (Sweet) Cherry

NY9 Plum

**NY9 Plum** - bright blue with yellow-green flesh. Productive and disease resistant and considered self-fertile. Good quality plum that is great for fresh eating and processing. Upright tree with a spreading habit. Tree has a low vigor, but is very productive.

**Black Cherry** (*Prunus serotina*) 12"-18" commonly called black cherry, wild black cherry, rum cherry, or mountain black cherry, is a woody plant species belonging to the genus *Prunus*. Does well in a wide variety of soil types. Good species for wildlife food.

Black Cherry
